DETAILED ACTION

1. According to paper filed on Nov. 23, 2005, the applicants have canceled claims 3, 4 and 22-36; amended claims 1, 2, 11-14 and 17 and furthermore, have added new claims 37-51.
2. Claims 1, 2, 5-21 and 37-51 are now pending in the application.

Response to Arguments

3. Applicant's arguments filed on Nov. 23, 2005 have been fully considered but they are not persuasive regarding enablement rejection of instant claims 19-21 and indefiniteness rejection of claim 19. The applicants have amended claims to delete non-elected subject matter. In regard to enablement, the examiner does not agree with the applicants arguments that the specification is enabling for treating every known thromboembolic disorder. As stated clearly in the last office action, the instant compounds will have utility in treating thrombosis. There is no teaching in the specification or prior art references provided to show that thrombosis is involved in the etiology of every known thromboembolic disorder. Thromboembolic disorders may involve other mechanisms for their etiology besides formation of thrombosis. In regard to indefiniteness of the term ---thromboembolic disorders---, the examiner does not agree with the applicants arguments since specific disorders are not defined.

Conclusion

4. Rejection of claims 19-21 under 35 U.S.C. 112, first paragraph is maintained for the reasons of record.

Art Unit: 1625

5. Rejection of claim 19 under 35 U.S.C. 112, second paragraph is maintained for the reasons of record.

NEW GROUNDS OF REJECTION

Claim Rejections - 35 USC § 112

6. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

7. Claims 47-51 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In claims 47-51, isoquinoline ring is substituted with -N(PG)s variable in formula (IV) in claim 47. This is new matter. There is no disclosure for such substitution on the isoquinoline ring in the specification.

8. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

9. Claim 51 recites the limitation "formula (II)" in claim 50. There is insufficient antecedent basis for this limitation in the claim.

10. Claims 1, 2, 5-18 and 37-46 are allowed.

11. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 1625
